Agenda at a glance:

DAY 1 - FRAMEWORKS, ALIGNMENT AND THE TOOLS TO GO DIGITAL
Monday 3rd April
Virtual only – Zoom Webinars
ALL UK TIME

10am – 11am
The Digital Trade Roadmap
Understand what frameworks need to be implemented, who does what and what we are aiming for.

12pm – 1pm
Alignment is the key!
International best practice and how national frameworks and forums can align to best affect and ensure we collectively deliver digitalisation across the trade system to help drive a uniform, global approach to frictionless, paperless trading systems.

3pm – 4pm
The business case for adoption of legal entity identifiers (LEIs)
How and why corporates should encourage the use of LEIs in their supply chains, the financial benefits, efficiency gains and procedural advantages of doing so, plus potential challenges, barriers and lessons learnt.

DAY 2 - BRINGING TRADE DIGITALISATION TO LIFE
Tuesday 4th April
In person only - Deloitte, 2 New Street Square (1st Floor), London, EC4A 3BZ
ALL UK TIME

9.40am – 10.40am
Building a port of the future
Meet the practitioners, technology providers and thought leaders behind the Teesside Freeport vision. In addition, we hear from other world leading ports to understand their latest challenges, how they and their clients are overcoming global supply chain issues and achieving greater efficiencies by adopting digital

ICC Türkiye

trade solutions.

10.40am – 11.40am
Lessons learnt from industry
2022 saw several high-profile digitalisation projects fail. We look at some of the lessons learnt and how we as an industry can apply this knowledge. What could have been done differently? What needs to change and how?

12.10pm – 1.10pm
The realisation of interoperable digital trade throughout the supply chain – a practical and honest conversation. The truth behind going digital
What's preventing companies/governments from implementing truly interoperable, cross-border frictionless systems and frameworks? What are the constant barriers to digital trade and how do we overcome them? How do we encourage more collaboration?

2pm – 3pm
Managing disputes in a digital trade transaction environment
This session discusses the increasing use of Smart Contracts but why the need for greater global adoption of cross-border exchange of electronic data and documents still exists. What needs to happen next to gain further use of Smart Contracts? What issues can potentially surface should commercial disputes arise?

3.30pm – 4.30pm
Techo-legal assurance for digital trade
With B2B data representing 90% of all data worldwide and a growing shift to electronic trade documents, what practical solutions are available to help manage the security of trade data throughout global supply chains?

DAY 3 - GUIDE TO IMPLEMENTATION
Wednesday 5th April
Virtual only – Zoom Webinars
ALL UK TIME

10am – 11am
Interoperability pilots – lessons from Australia, China, Japan and Thailand
Authorities in China, Japan and Thailand have been working with industry to test the use of cross border electronic trade documentation including e-invoices, e-packing lists and e-certificates of origin. This session will highlight what has been learnt.

12pm – 1pm
Interoperability pilots – lessons from the UK, Singapore and private sector
C4DTI and the IMDA are delivering the first pilot to test electronic bills of lading involving two governments linking East and West. Lloyds Bank have delivered one of the first electronic Promissory Note test pilots. This session will be practical and highlight the challenges, opportunities and what lessons can be drawn for other geographies and actors.

3pm – 4pm
The future is bright, the future is interoperable
Paperless trade, interoperable systems, smart contracts, digital currencies and financial settlement on the border are fast becoming a reality. These new developments will remove many of the traditional processes and radically improve the way we trade. This session will provide a practical insight into how trade will work in 3-5 years' time, what barriers we are likely to face and how we turn opportunity into reality.
