Report number	**DO-32633/EN**
Title	**Supply of lightweight robotic manipulators**
Activity code	**11030800M**
Reply date (yyyy-mm-dd)	**2020-07-20 16:00 (Expressed in Europe/Zurich time zone)**

This Technical Specification concerns the supply of four lightweight robotic manipulators. The delivery is foreseen over nine weeks from notification of the Contract.

2.1 General Description

The Supply shall be a lightweight robotic manipulator with at least 6 DoF. The manipulator will be integrated in an already existing mechatronic system. The robotic manipulator shall provide a standard communication interface and shall be controllable by a custom external controller, in order to be integrated in an already existing control system.

2.2 Content of the Supply

The Supply shall include:

- Technical deliverables as specified in §3: o four robotic manipulators;
- Activities as specified in §5, in particular:
  - packing and shipping, if so requested by CERN;
  - maintenance;
- Documentation as specified in §4, in particular:
  - electrical wiring diagram;
  - SDK documentation;
  - low-level communication protocol;
